

**Grow beyond the branch—and
complement your existing
strategy—with embedded banking.**

Here's how it works

Provide access to banking capabilities—like opening an account or viewing balances—within your own custom app or a non-bank partner's digital platform.

This strategy expands your reach and adds convenience by embedding banking capabilities at the point of need.

With Apiture, you'll get started quickly and easily, without a large technical lift.

Who can you partner with?

The options are endless...

Help students view and adjust balances while paying tuition directly in the university's student portal

Allow property managers to open deposit accounts within real-estate apps

Enable medical practice administrators to view incoming transactions and reconcile these payments with outgoing invoices.

**Contact us to learn more about how to grow
beyond the branch using embedded banking**
